

WHAT WE STAND FOR

Guash Inc. is a premier fully integrated steel package supplier providing reliable, efficient, and outstanding service from project bidding to on-time completion

YOUR STRUCTURAL STEEL PARTNER

Guash Inc. offer end to end solution for your structural steel requirement for fabrication, tanks, modules, vessels, assembly for project in energy, chemical and infrastructure sectors.

YOUR PIPING MATERIAL PARTNER

Guash Inc. offers complete solution for any medium to flow with in process lines, cross-country lines, station lines, modules and process lines. We offers our products such as pipes, fittings, flanges, Olets in all sizes, type, grade in metal form.

YOUR INSTRUMENTATION MATERIAL PARTNER

Guash Inc. offer connecting lines with measuring and monitoring systems to guage the system work's in perfect conditions to give optimum results in safety way.

GUASH PRODUCTS RANGE

Guash Inc. understand that providing effective supply chain management of steel products is the key to making a project successful, keeping it on track and reducing costs, with fast turnaround and reliable deliveries are of paramount importance in keeping downtime to a minimum during maintenance periods.

Guash Inc. in supplying the complete steel package plates, pipe, fittings, flanges, valves, sections, gaskets, and plugs, to complete the package.

PIPING MATERIAL RANGE

- Pipes - Carbon Steel, Chrome Moly
- Pipes - Stainless Steel, Nickel Alloy
- Titanium and Hastelloy Pipes
- Conductor Pipes and Connectors
- Drill Pipes and Casing Pipes
- TP Flange, Anchor Flanges, Swivel Flange
- Flanges - Slip-On, Weld-Neck, Socket-Weld
- Flanges – Threaded, Lap Joint, Orifice, RTJ
- Flanges – Plate, Spectacle, Blinds
- API Flanges, Spade & Spacer
- Transition pieces
- Elbow, Return Bends
- Reducers, Tee's, Caps, Nipple's
- Expansion Joints, Stub Ends
- Cross, Olet's, Y-type
- Flanged Fittings
- Special Customized forged fittings
- Pressure fittings
- Strainers
- Insulation Joints
- Barred Tee's

Guash Inc. entire systems are designed to match your requirements, reduce risk, lower costs, and satisfy our customer, at the point of delivery, the overarching benefit of one-source supply. Guash Inc. focus on cost savings techniques while maintaining the good quality products and services. Guash is an Independent company with the flexibility to choose the best suppliers appropriate to each customers requirement in terms of price, quality, product availability and delivery, not tied to any one supplier.

STRUCTURAL STEEL RANGE

- Plate – Commercial and Shipping grade
- Plate – Ultra High Strength Steel -S690 QL, Stainless and Alloy Grades.
- High Yeild Welded Pipes - 2H,2W, S690 QL, X52/56/65/80
- Rectangular & Square Hollow Section
- Circular Hollow Section
- Round/Hex/Square Bar
- Flat Bar
- Universal Beam & Channel
- T-Section
- Angle and Channel
- HR Coils/Sheets
- Chequered Plate
- Spud Cans and Cones
- Sheet Piles and Pipe Sleeves
- Bulb flats
- Shapes and Cones

Guash Inc. Supplies offers wide range of valves in it's forte. Valves are devices used to control, regulate and open/close the flow and/or the pressure of a pipeline and/or a piping system. Valves are extremely critical and expensive components and one of the determining factors of pipelines reliability, safety, and performance. There are many different types of valves, most often used in combination, which perform specific functions within the piping system or the pipeline. In terms of valve body construction, valves are classified in cast and forged type.

VALVE, ACTUATOR, STRAINER RANGE

- Gate (API 600 Cast gate, API 602 Forged, API 603 Cast stainless steel gate, API 6D Expanding Gate, API 6D Slab gate, Knife Gate, Pressure seal gate, etc.)
- Globe (BS 1873 Cast globe valve, API 603 Stainless steel globe, API 602 Forged Globe valve, Y-Globe, Pressure seal globe)
- Check (Swing check, Piston check, ball check, Spring check, Pressure seal check)
- Ball (Floating, Trunnion)
- Butterfly (concentric, double eccentric, triple eccentric) Strainers (Y-shape, T-shape or basket strainers)
- Plug (API 6A plug, API 6D plug)
- Pinch, Pressure relief/safety valve.
- Diaphragm, Control valves (ball, butterfly, and globe type) Cryogenic valves).

YOUR VALVES SUPPLY PARTNER

Guash Inc. supplying valves to the needs of energy sector, infrastructure, chemical industries, process industries to control the fluid mechanics of medium flowing with in the lines.

YOUR MACHINING AND FABRICATION NEED PARTNER

Guash Inc. in-house machining facilities offer light and medium machining services. We also provide integrated solution for medium piping and structural fabrication for project requirement .

YOUR PROCESS EQUIPMENT PARTNER

Guash Inc. partners with reputed process equipment manufacturers to provide solution for process equipment by strategic partnership for cost effectiveness with local fabrication including process warranty and design.

YOUR REPRESENTATION PARTNER

Guash Inc. also promote activities for marketing of products in various region through our offices to facilitates partners products by local daily excess.

For more information on any of our products or services please visit us on the Web at: www.guashinc.com

VALUE ADDED SERVICES

Guash Inc. offer bespoke service customized according to project needs.

- Integrated steel package supplier
- Combined production resources
- One window solution for monitoring production to meet deliveries
- Warehousing, identification, quality check, marking, color coding, split destinations
- Supply contracts and allocation with reputed mills
- Documentation support for movement of material with global logistic service contract
- Expediting, documentation, shipping with single point coordination
- Customized Frame agreements, Blanket price agreements, stock buyback programs

MACHINING, FABRICATION & PROCESS EQUIPMENT, INSTRUMENTATIONS

Guash Inc. having in house machining facility equipped with CNC, VMC, Cutting, Drilling, Honning, Serration meet various project requirement as well support fabrication needs,Guash partner with fabrication facility to do medium size fabrication work like skid, spooling and process equipment fabrication.

FABRICATION RANGE

- Spooling, Bracings
- Flanged Elbow, Sphere tee's
- Laterals, Y-Pieces, Lateral Strainers, Split Tees
- Headers, Vessels, Heads, Dished Ends, Cones
- Miter Pipes and bends, Manifolds, Structural modules
- Cradle, Shoe, Pipe Supports, pipe racks
- Boiler, Tanks, Process Skids
- Cladding
- Buckle arrestors

INSTRUMENTATION, GAUGES, SENSORS, METER

- Pressure Controllers, Diaphragm Seals, Pressure Gauges
- Pressure Transmitters & Transducers
- Pressure regulators, Pressure Switches
- Force measurement Instrumentation
- Temperature controllers, Heaters, Infrared Pyrometers
- Temperature Transmitters, Thermal Imagers
- Temperature Switches, Thermowells
- Differential Pressure flowmeters
- Electromagnetic flowmeters
- Positive displacement flowmeters

PROCESS EQUIPMENT RANGE

- Gas and liquid treating
- Gas & Liquid Dehydration
- Sulfur recovery
- Natural gas liquids (NGL) recovery
- Ethane removal from natural gas
- CO2 purification and liquefaction
- Carbon dioxide (CO2) dryer
- Hydrogen and synthesis gas
- Fractionation
- Isomerization
- Fuel Gas Conditioning
- Stabilization
- Water Treating
- Compressor stations
- Natural gas heaters
- Crude oil heaters
- Water bath heaters
- Salt bath heaters
- Regeneration heaters
- Low temperature separation
- Refrigeration units
- Produced water treatment
- Liquid and gas
- Nitrogen generation packages
- Reverse Osmosis system
- Waste water treatment plants
